PERSONAL STATEMENT

At the University of Maine, I am the founding director of the [CompuMAINE Lab](#) (Computational Modeling, Analysis of Images and Numerical Experiments). I have co-authored **75 publications**. My work is published in journals such as Astrophysical Journal, Frontiers in Physiology, the PLoS journals, and PNAS. Applications include breast cancer (which has led to two issued patents), cell nucleus architecture, regenerative medicine, muscle cell morphogenesis, neuroscience, pure mathematics, and astrophysics. I have trained (or am currently training) **30 thesis students** (8 PhDs + 16 Masters + 6 Honors), obtained **33 grants/contracts totaling \$6.5M** (as PI, co-PI or senior personnel), while developing or restructuring several undergraduate and graduate courses.

Breast Cancer Research: I authored 10 peer-reviewed publications on breast cancer, advised 11 students working on their theses over this breast cancer project, and secured **over one million dollars in funding specifically for the breast cancer project:** from the University of Maine (\$158K), the Maine Cancer Foundation (\$328K), the National Cancer Institute (\$418K), the Maine Technology Institute (\$25K), the National Institute of General Medical Sciences (\$25K), and the National Science Foundation (\$50K).
